OBJECTIVE

Computer Science undergraduate with strong programming fundamentals, hands-on project experience, and a passion for problem-solving. Seeking the Customer Experience Engineer – Intern role at HackerRank to apply debugging, REST API, and analytical skills in a customer-facing engineering environment while delivering clear, effective technical communication.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, C, C++

Web & Backend: HTML, CSS, Flask, Django, Spring Boot, REST APIs & HTTP fundamentals

Databases: DBMS, MongoDB

Core Strengths: Debugging & Problem Solving, Analytical Thinking, Data Structures & Algorithms

PROJECTS

Weather App

- Developed a weather forecast app that consumes a third-party REST API, letting users search any city to instantly view temperature, conditions, humidity, and wind speed.
- Handled API requests, JSON response parsing, and error/edge-case handling — building practical REST API & HTTP experience directly relevant to customer-facing technical troubleshooting.

College Management System

- Built a comprehensive system to manage student data, courses, and academic records, demonstrating practical application of debugging and structured problem-solving.
- Integrated database operations using DBMS/MongoDB for efficient data storage and retrieval, reinforcing backend and data-handling fundamentals relevant to REST API based systems.

Quiz App

- Built a dynamic, interactive quiz application with screen transitions, score tracking, and instant result display, featuring a guided user flow from start to finish.
- Implemented stateful front-end logic for answer validation and user-triggered events; styled with a dark UI for a polished, engaging experience.

To-Do List Application

- Built a minimalist To-Do List app for organizing daily tasks, supporting full task creation and management through a clean, intuitive interface.
- Implemented form handling and dynamic DOM manipulation with a responsive, dark-themed component design.

Competitive Programming — LeetCode & GeeksforGeeks

- Solved 450+ Data Structures & Algorithms problems in Java covering Arrays, Strings, Linked Lists, Trees, Sorting, Searching, and Dynamic Programming.
- Built consistent analytical thinking and rapid problem-solving ability through regular practice — directly applicable to triaging and resolving customer-reported technical issues.

EDUCATION

B.Tech, Computer Science Engineering — Parul University

Expected 2028

Vadodara, Gujarat | CGPA: 7.81

CERTIFICATIONS

- JavaScript Certificate — Modern JavaScript Programming
- AI 10x Tool Certificate — AI Productivity & Tools Training
- National Space Day — Program Participant
